

# Ruane Construction Ltd

## Timber Procurement Policy

As an organisation we shall consider and use sustainable practices as part of our procurement processes. Ruane Construction as a procurer of timber, have implemented this policy and aim to ensure that timber furniture and wood based products are only procured from legal sustainable and certified sources.

It is the organisation's policy to only procure timber and wood products from FSC (Forest Stewardship Council) or PEFC (Programme for the Endorsement of Forest Certification) certified sources.

Ruane Construction also requires that their suppliers and contractors maintain the principles of legal and sustainable sources. This shall be monitored during audits, and we shall seek evidence of a valid chain of custody.

We shall never knowingly procure timber and wood based products from illegal logging operations and shall endeavour to comply with industry best practice, Environmental Protection legislation, and social and ethic laws.

Final responsibility for this policy will lie with Ruane Construction Managing Director, who will review this policy annually. The implementation of the policy is a collective responsibility of all employees, subcontractors and suppliers.

The company is committed to continual improvement in Timber Procurement. Any feedback or ideas for improvement should be flagged up during monthly office meetings.
